NATIVE91

AWS CLOUD HOSTING COST ESTIMATE

Quotation for	Native91 marketplace
Cloud region	AWS Asia Pacific (Mumbai) – ap-south-1
Operating system	Ubuntu 24.04 LTS
Billing assumption	Linux On-Demand, 730 hours per month
Estimate date	2 November 2026

1. Server options for Native91

Option	EC2 instance	CPU / RAM	Indicative compute / month
Small / low traffic	t3.small	2 vCPU / 2 GB	■1,300–■1,700
Recommended	t3.xlarge	4 vCPU / 16 GB	■11,500–■12,500

2. Recommended configuration – t3.xlarge

Item	Specification
Compute	4 vCPU, 16 GB RAM
Storage	150 GB EBS gp3 SSD (budget assumption)
Applications	Native91 User, Vendor and Admin frontend/backend
Database	MongoDB self-hosted on the same EC2 instance
Web / process management	Nginx and PM2

3. Estimated monthly charges – recommended 16 GB server

AWS service	Estimated monthly cost
EC2 t3.xlarge compute	■12,411
EBS gp3 SSD – 150 GB	■1,298
Public IPv4 address	■346
Backup snapshot allowance	■300–■800
Ubuntu, Nginx, PM2 and self-hosted MongoDB software	■0 software licence*
Estimated subtotal	**■14,355–■14,855**
GST estimate (18%)	**■2,584–■2,674**
Estimated monthly total including GST	**■16,939–■17,529**

Suggested budget for the recommended setup: ■18,000 per month, subject to actual AWS usage.

4. Alternative monthly budget – 2 GB RAM server

Item	Indicative monthly cost
EC2 t3.small compute (2 vCPU, 2 GB RAM)	■1,300–■1,700
EBS gp3 SSD – 40 GB	■300–■350
Public IPv4 address	■346
Backup snapshot allowance	■100–■300
Estimated subtotal	**■2,046–■2,696**
GST estimate (18%)	**■368–■485**

Estimated 2 GB server total including GST **■2,414–■3,181**

Important: The 2 GB option is a low-cost alternative for testing or a light workload. It is not recommended for hosting all Native91 panels and MongoDB together in production because memory may be insufficient.

5. Included software and services

- Ubuntu 24.04 LTS
- Nginx web server and reverse proxy
- PM2 process manager
- MongoDB Community Edition, self-hosted on EC2
- Let's Encrypt SSL certificate (no certificate fee)

6. Exclusions and billing notes

- This is an indicative budget estimate, not a binding AWS quote. Actual charges depend on region pricing, currency conversion, usage, discounts and tax treatment.
- Data transfer beyond applicable AWS free allowances, additional snapshots, monitoring, AWS support plans, Route 53 hosted zones, domain renewals and third-party services are excluded.
- EC2 estimate assumes 730 running hours per month and Linux On-Demand pricing. T3 Unlimited CPU credit charges may apply where applicable.
- MongoDB is self-hosted; no separate managed database service is included. Storage and backup allowances are planning assumptions.
- Deployment, migration, maintenance, application development and support labour are not included.
