Professional Summary

Enthusiastic Full Stack Developer with strong foundations in Java, JavaScript, React.js, Node.js, Express.js, MySQL, Docker, and REST APIs. Experienced in developing secure web applications, desktop software, and scalable backend systems. Passionate about backend development, problem solving, and building efficient software solutions with clean architecture. Seeking a Software Developer role where I can contribute while continuously learning and growing.

Technical Skills

Languages: Java, JavaScript, Python, C++
Frontend: React.js, HTML, CSS
Backend: Node.js, Express.js
Databases: MySQL, MongoDB
Tools: Docker, Git

Projects

OnComp – Online Coding Platform

Tech Stack: React.js, Node.js, Express.js, Docker, MongoDB, WebSocket

- Developed a secure online coding platform supporting multiple programming languages.
- Implemented Docker-based isolated code execution to ensure secure and parallel code execution.
- Integrated WebSockets for real-time compilation status and execution updates.
- Utilized Redis for asynchronous job queue management and efficient task processing.
- Designed the application using a microservices architecture for improved scalability and maintainability.
- Developed a responsive frontend using React.js and built RESTful backend APIs using Node.js and Express.js.

ShopEase – Desktop E-Commerce Management System

Tech Stack: Java, Java Swing, JDBC, MySQL

- Developed a desktop-based e-commerce management application for product management and purchasing.
- Implemented secure user authentication, profile management, wishlist, and purchase tracking.
- Integrated MySQL using JDBC for efficient database connectivity and CRUD operations.
- Applied Object-Oriented Programming principles to create reusable and maintainable modules.
- Designed an intuitive Java Swing interface to improve user experience.

College ERP System

Tech Stack: React.js, Node.js, Express.js, MySQL

- Developed a centralized ERP platform to manage students, faculty, attendance, and examination records.
- Built secure role-based dashboards for Admin, Faculty, and Student users.
- Designed responsive user interfaces using React.js for improved accessibility.
- Integrated REST APIs for seamless communication between frontend and backend services.
- Optimized database operations to streamline academic and administrative workflows.

Education

Bachelor of Technology (B.Tech) in Computer Engineering **Expected Graduation: 2027**
LDRP Institute of Technology and Research, Gandhinagar

Achievements

- Successfully completed the **NPTEL Python for Data Science** certification, strengthening knowledge of Python programming
- Participated in multiple hackathons, collaborating in teams to develop innovative software solutions under strict time constraints.
- Solve Data Structures and Algorithms (DSA) and aptitude problems to strengthen logical thinking and problem-solving skills.

Areas of Interest

- Backend Development
- Java Development
- Full Stack Development
- Docker
- Artificial Intelligence
